DIRECTORATE FOR ENGINEERING SCIENCES**

SUBJECT: Meeting of the ASTM F15.20 Infant Bath Tubs Subcommittee

DATE OF MEETING: October 20, 2022

LOG ENTRY SOURCE: Zachary Foster (ESHF)

DATE OF LOG ENTRY: October 31, 2022

LOCATION: Virtual (WebEx) and In-person (Sheraton Hotel, New Orleans, LA)

CPSC ATTENDEE(S): In-person: Celestine Kish (ESHF), Jacqueline Campbell (EXHR)
WebEx: Zachary Foster (ESHF), Zachary Goldstein (LSM), Ashley Johnson (HSPP), Suad
Wanna-Nakamura (HSPP)

NON-CPSC ATTENDEES: Contact ASTM for attendee list

SUMMARY OF MEETING:

This meeting of the ASTM Infant Bath Tubs subcommittee was led by the subcommittee chair, Patty Edwards. The meeting centered around a discussion of the work done by the Stability Task Group to draft stability requirements for ASTM F2670. The task group presented its draft language to the subcommittee. One member expressed concern about the proposed language not using water in its test method. Another member brought up the question if the stability requirements need to specifically address products that fit over an adult tub. The subcommittee will return a draft with comments back to the task group, and the task group will continue to work on the draft language. The subcommittee issued a call for additional members for the task group. CPSC staff are participating in the task group.

The meeting was then adjourned. Dates have not yet been set for future meetings.
